PROTOTYPE NOTES

- Captured measurements and coach scores are provisional and remain subject to review.
- Pose analysis checks capture quality only; it does not determine the test measurement or score.
- A coach must review recorded data before it can support an assessment decision.

RECOMMENDATIONS

- Approve the test protocols and scoring standards before collecting production assessments.
- Validate the model and measurement workflow with qualified coaches and representative data.
- Keep the coach-review step in place for every prototype capture.

Verification is unavailable in this prototype
